

Respiratory Therapy (RT) Pathway Program

READY TO FURTHER YOUR EDUCATION?

Through our partnership with Vermont State University, our RT Pathway Program allows full-time employees of partners within the UVM Health Network to continue earning full-time wages and benefits while studying to complete their Associate of Science in Respiratory Therapy degree and earn their Registered Respiratory Therapist (RRT) credential.

WHAT DOES A RESPIRATORY THERAPIST DO?

Respiratory therapists deliver care that helps people manage a wide range of breathing problems caused by disease, accident or illness. These professionals provide care whenever and wherever breathing is an issue. They work in hospitals or other acute care settings, or are employed in clinics, physicians' offices, or skilled nursing facilities.
